

# Curriculum Vitae

**E. H.**

## Java/JEE Docent

### **Executive summary:**

E. a very motivated ICT trainer, specialised in the Java Programming Language. He tries to pass his knowledge to his students with patience and passion, eager to take them all to a higher level. Enlarging his knowledge with new or updated topics is like a second nature and keeps him on top of the actual techniques.

Though E. is an excellent trainer and coach, he thinks it's important to keep focused on development. That's why E. restarted, after completing Vebis in 2007, in open source development projects since February 2012. (Detailed content of his development projects can be found in his Developer CV, to obtain on simple request.)

IKM assessments are designed to measure overall proficiency in a subject and depth of knowledge in specific sub-topics. This score report does not provide a criterion-referenced interpretation, pass/fail score or standard of performance. Please note that test results, in isolation, are not pure predictors of success in employment or any given role. Other indicators, such as prior experience, references and interviews, should be considered prior to any employment or business decisions.
